

# Introducing AusAlert™

## Information for schools

AusAlert is a new warning system that sends emergency messages to compatible mobile devices during disasters such as bushfires, severe weather and public health emergencies.

It's a fast and reliable way to tell you what to do in an emergency.

An AusAlert can be sent to compatible:

- mobile phones
- tablets
- smart watches
- children's safety watches.

An AusAlert may:

- **make the device vibrate**
- **play a loud siren-like sound for about 10 seconds.**

**If you receive an AusAlert during school hours:**

- **stay calm**
- **follow the instructions of your teachers and school staff.**
